

Project Initialization and Planning Phase

Project Name: ComicCraft – AI Powered Comic Story Generator

Define Problem Statements (Customer Problem Statement)

Problem Statement 1

Problem Statement	Description
I am	A student who enjoys storytelling and creative writing.
I'm trying to	Create engaging comic stories with attractive illustrations.
But/Because	I do not have professional drawing skills and creating comics manually requires significant time and effort.
Which makes me feel	Frustrated because I have creative ideas but cannot easily transform them into visually appealing comics.

Problem Statement 2

Problem Statement	Description
I am	A content creator who wants to publish comic-based content on social media platforms.
I'm trying to	Generate comic stories quickly and consistently.
But/Because	Designing characters, writing dialogues, and creating illustrations manually is time-consuming and expensive.
Which makes me feel	Limited in my ability to produce content regularly and efficiently.

Problem Statement 3

Problem Statement	Description
I am	An educator looking for creative ways to teach students through storytelling.
I'm trying to	Develop educational comic materials for classroom learning.
But/Because	Creating educational comics requires artistic expertise and specialized software.
Which makes me feel	Challenged in delivering engaging visual learning experiences.

Problem Statement 4

Problem Statement	Description
I am	A beginner interested in comic creation.
I'm trying to	Turn my imagination into a complete comic book.
But/Because	I lack the technical knowledge, artistic skills, and resources needed for comic development.
Which makes me feel	Discouraged from pursuing my creative ideas.

Final Customer Problem Statement

A student, content creator, educator, or aspiring storyteller wants to create engaging comic stories with high-quality illustrations. However, the traditional comic creation process requires significant artistic skills, technical expertise, time, and financial resources. As a result, users often struggle to transform their creative ideas into professional-looking comics, leading to frustration and reduced creative productivity.

Proposed Solution

ComicCraft is an AI-powered comic generation platform that enables users to create complete comics from simple text prompts. The system automatically generates:

- Comic storylines
- Character dialogues
- Narrations
- AI-generated illustrations
- Multi-panel comic layouts
- Downloadable PDF comics

This solution reduces the effort required for comic creation while making storytelling accessible to users regardless of their artistic background.

Expected Impact

- Faster comic creation process
- Reduced dependency on artistic skills
- Increased creative productivity
- Improved accessibility for beginners
- Enhanced storytelling experience through Generative AI
