

EMPATHY MAP

Project Name: ComicCraft – AI Powered Comic Story Generator

PERSONA

Name:

Arun Kumar

Role / User Type:

Student & Aspiring Story Creator

SAYS

- I have many creative story ideas but I cannot draw comics professionally.
 - Creating comics manually takes too much time.
 - I want an easy way to convert my ideas into visual stories.
 - I wish there was a tool that could generate comics automatically.
 - I need a simple platform that helps me create comics without artistic skills.
-

THINKS

- There should be a faster method to create comics.
 - AI can help automate storytelling and illustration.
 - Professional comic creation software is difficult to learn.
 - I want my stories to look visually appealing and professional.
 - It would be useful if I could download and share my comics easily.
-

DOES

- Writes story ideas in notebooks or digital notes.
 - Searches online for comic creation tools.
 - Experiments with AI tools for content generation.
 - Shares creative stories on social media platforms.
 - Looks for free or affordable creative software.
-

FEELS

- Frustrated when unable to draw story ideas effectively.
 - Excited about the possibility of AI-generated comics.
 - Motivated to share creative content with others.
 - Overwhelmed by complex comic design software.
 - Satisfied when a story is transformed into a complete comic.
-

Customer Insight

The primary user of ComicCraft is a student, beginner creator, or storyteller who has strong creative ideas but lacks the artistic skills, technical expertise, and time required for traditional comic creation. These users seek a simple and efficient solution that can automatically generate stories, dialogues, illustrations, and comic layouts from a basic text prompt.

Opportunity Identified

There is a growing demand for AI-powered creative tools that simplify content creation. ComicCraft addresses this need by enabling users to generate complete comics quickly and easily through Generative AI technologies, making storytelling more accessible and engaging for everyone.

How ComicCraft Solves the User Problem

ComicCraft helps users by:

- Generating comic storylines from simple prompts.
- Creating dialogues and narrations automatically.
- Producing AI-generated illustrations for each panel.
- Combining text and images into a comic layout.
- Exporting comics as downloadable PDF files.
- Reducing the time and effort required for comic creation.

Conclusion

The empathy map reveals that users want an easier and faster way to transform their ideas into visually engaging comics. By leveraging Generative AI, ComicCraft provides a customer-centric solution that removes technical barriers and empowers users to create professional-quality comics regardless of their artistic experience.
