Customer Journey Summary

Stage 1: Discover & Explore

The customer visits ComicCraft to learn about the platform and understand how AI can help create comics automatically. During this stage, the user evaluates whether the system is simple, useful, and capable of generating quality comics.

Stage 2: Generate Comic

The customer enters a story prompt along with preferences such as character details, tone, and art style. The AI system generates a comic storyline, dialogue, narration, and illustrations. This is the most critical interaction stage of the customer journey.

Stage 3: Review & Download

The customer reviews the generated comic, verifies the story flow and illustrations, and downloads the final comic as a PDF. A positive experience at this stage increases user satisfaction and encourages future use.

Key Insights

- Users want a simple and intuitive comic creation process.
 - Fast generation time significantly improves user satisfaction.
 - High-quality illustrations and coherent storytelling are the most important success factors.
 - Easy PDF export and sharing options enhance the overall user experience.
 - Additional customization options can improve long-term user engagement.
